

Full Stack Developer

Scotiabank

Toronto, Ontario

Our Canadian Digital Banking Engineering – Applications team is looking for a seasoned Full-Stack Developer to help deliver innovative, customer-centric solutions. You'll work with modern JavaScript frameworks and the MERN stack to build secure, scalable applications that power digital banking experiences.

Is this role right for you? In this role you will:

- Design and develop full-stack applications aligned with business requirements.
- Implement robust APIs and front-end interfaces using modern frameworks.
- Collaborate on roadmap initiatives and contribute to technical decisions.
- Bachelor's degree in Computer Science, Computer Engineering

Skills: We'd love to work with you if you have:

- REST API Design & Integration – 1-2 years
- React – 1-2 years
- Node.js – Including production deployment (1-2 years)
- SQL / MongoDB – Database design and integration (1-2 years)
- Modern JS Tooling – ES6+, Webpack, Babel, Jest (1-2 years)
- Authentication & Security – OAuth2 or similar, working knowledge of JWT, session management
- Object-Oriented & Functional Design – 1-2 years
- HTML/CSS/SASS – Familiarity with BEM, OOCSS, SMACSS, CSS3 Animations (1-2 years)
- Redis – Understanding of caching strategies and session management
- Experience working within Agile teams and participating in code reviews
- Experience using testing frameworks (Jest, React Testing Library, Mocha etc)
- Experience working with CI/CD pipelines
- Nice-to-have: Server-Side Rendering experience
- Nice-to-have: Accessibility & Internationalization (JAWS, VoiceOver)
- Nice-to-have: Experience with estimation and planning skills
